Vision: **(4/4)**

There should be a half-page vision document that explains the overall projects vision including:

- What is the project (1)

- Who is the user (1)

- What is (are) the key feature(s) (selling points) (1)

- No technical details (1)

User stories: **(4/4)**
- 8 to 12 big user stories (2) //1 mark if there are fewer

- detailed stories for 2-3 high priority stories (2)

Planning: **(3/3)**
- Stories need to have priority and cost estimations. (2)

- It should be clear which stories are for iteration 1 (1)

Technology choices: **(1.5/2)**
- A 1 page document explaining the technology stack that is going to be used (0.5/1)

- Justification of the chosen technologies (1)

Repository: **(2/2)**

A working GitHub repository with all the above plus the communication logs

- Communication logs, either in GitHub or other tools

- Up to (-5) if GitHub access has issues

WCF is not RESTful by default, but you can make it so. You did not clearly specify which DBMS you are going to use. A bit more comprehensive outline of meeting would be appreciated. You did not clearly include the list of attendants.

Total   **(14.5/15)**
